

Forensic economist - JUNIOR (head office in Calgary)

Brown Economic Consulting is an economic consulting firm that supplies court-ready reports and expert witness testimony for lawyers and insurers in civil litigation across all provinces and territories in Canada (except Quebec).

Essential characteristics of the job:

- ➔ Using economic principles and theories learned in university, applying them to actual fact situations to help claimants
- ➔ Composing background histories of individuals and analyzing tax information
- ➔ Data analysis, locating salary data and surveys, specializing in labour market research (unemployment, non-wage compensation, retirement, etc.)
- ➔ Using labour market data and Statistics Canada data to assist senior economist in constructing lifetime wage profiles; locating data for contingencies to apply to profiles
- ➔ Working with Statistics Canada's PUMF data, SLID data, and LFS data
- ➔ Adapting raw data from Statistics Canada's surveys (e.g. Survey of Household Spending, General Social Surveys, PALS surveys, etc.)

Compulsory Qualifications:

- **Bachelor's or Master's of arts degree in Economics.** Degrees in other specialties are not accepted (e.g. MBA), except for actuarial science.
- Proficiency is compulsory in MS-Word and MS-Excel as well as in composing and typing. Typing speed > 60 WPM preferred.

Compensation matches the applicant's education level, work experience and skill level.

Interested candidates should assemble the information requested in the employment section of our website (www.browneconomic.com > corporate profile > careers @ BEC > "CRITERIA") and direct their responses in confidence to:
